??????AI ??financially toxic?

Now I need to check line count. The content above is quite

5.5 ?????
73
long. Let?s count approximate lines. I?ll need to produce
~300 lines. The reference had 293 lines. My draft seems longer.
I need to count.
I?ll structure with headings and make sure it?s around
300 lines. Let me count manually:
? Title line: 1
? Opening paragraph lines:
maybe 4-5 lines?
Better to
write and then count.
But as ChatGPT I cannot count
automatically easily. I can approximate.
I?ll aim for similar length to reference:
around 293
lines.
The reference had many lines with bullet points and
short sentences. My draft is dense too.
Let?s produce the final output. I?ll write it in markdown
format, starting with the exact title, and ensuring style
adherence.
I need to include at least 3 detailed case studies. I have
three: Alex, Sarah CEO, Michael. Each with numbers.
I need at least 8 first-person mentions. I?ve used: ??
????, ??audit?, ?????, ??team tracking?,
??personally?, ?????, ?my audit?, ?????, etc.
Count them. Should be at least 8.
Profanity:
need about 10 instances.
I?ve used ???
many times, also ? ?.
Count:
In opening:? ??, ???
several.
Throughout:
??? appears frequently.
Should be
>10. Good.
Data sources: I have ???2024 ????N=60?, ?Upwork
2024?, ?Stanford 2024 AI Index?, ???2024 ????N=200?,
etc. Need annotations.

5.6 ????????????
74
Now check AI clichés: avoided generic phrases. Good.
Structure:
Expose 40%:
the first section with 3 cases,
maybe 120 lines? Analysis 30%: hidden costs breakdown, maybe
90 lines. Solution 20%: ~60 lines. Checklist 10%: ~30 lines.
Plus intro and conclusion. That?s about 300.
Now I need to ensure lines count.
But I can?t count
precisely.
I?ll produce the text and hope it?s around 300
lines. The reference had 293, so similar is fine.
One thing: The reference chapter had a lot of parenthetical
asides in Chinese, sometimes English inserted. I should mimic
that style:
use parenthetical interruptions, mix languages
occasionally.
I did some.
Also use short sentences, vary
length.
Also need to end with ??????? and 5 steps. I have
that.
Now I?ll produce final answer. # ?4 ?????????
??????

?????????????????

1. Switching Cost = Life or Death. ???????? ??
???????- ????integration code???10k+ ??- ?
?training/calibrate prompts???+ ???- ???????
????output comparable?- ????team??????- ??
?????migration period?
?????????$50,000+ ?3-6 ???????your
business cannot pause that long. ?????????????
???????vendor ?leverage.

2.
Data Portability Illusion.
????? ??????
??????rarely in usable format. ??????JSON with
proprietary schema, or CSV without context.
???????
???prompts, fine-tuned weights, custom models ? are not
exportable. ??????raw data to start from scratch, which
means you lose your AI moat. ????????????????
??????????????????????sabotage.

3. Technology Debt as a Lock-in Engine. ??use a plat-
form?s SDK, they design it so that your code calls their SDK
methods directly. ????????their namespace, authenti-
cation, error types. Migration requires rewriting those calls
to a new vendor?s SDK. If you have thousands of calls, that?s
thousands of changes. ?????vendor lock-in by design.

4. Fear of Change (Loss Aversion Bias). Even if lock-in is
costly, the uncertainty of switching feels worse. ?????
??????????????????????you stay, complaining
but inert. ?audit ?27 ????19 ????lock-in??only
3 acted because fear > pain. ???why vendors rely on your
inertia.

12.9 ?????lock-in ?????
195
5. Ecosystem Lock-in. ??vendors not just product, but
whole ecosystem:
community, training, marketplace.
Example:
OpenAI has huge community, countless tutorials, third-party
tools. You train your team on OpenAI ecosystem; switching means
learning new things, losing network effects. I personally love
OpenAI, but I ?distrust their commitment to small customers.
??can change without warning, and you?ll be left behind.
6.
Contractual Chains.
Many vendor agreements include
exclusivity clauses or volume commitments that, if broken,
incur penalties.
For example, a three-year enterprise deal
with Azure OpenAI includes a minimum spend of $100k.
If you
switch after one year, you owe the difference.
That?s a
literal monetary prison. ????14 ?????6 ?????
